

## Clinical Trials-Research

### **Verrucous Carcinoma of the Foot**

Steven Miller, D.P.M.

Journal of Foot and Ankle Surgery 40(4):225-231, 2001

Verrucous carcinoma is an uncommon form of squamous cell carcinoma. Clinical and histological features of this condition are reviewed. Excision is the treatment of choice due to local aggressiveness and infrequent metastasis. Two cases involving the foot are presented as well as a survey of previously documented cases of this condition.
